OUR POLICY

We aim to serve the planting public in a limited area. To provide hardy and good quality nursery stock. The largest per cent of our stock is grown in our nursery, therefore assured hardiness for this climate.

We guarantee all stock to be true to name. Our nursery is inspected by the State Entomologist and certified free from disease and insects. We guarantee all stock to be in good "live" condition when purchased and delivered. When there is evidence of stock dying after being properly planted and cared for we will replace any plants with the exception of annual, perennials, and roses, that fail to grow during the first growing season, at one-half the catalogue price. This does not apply to Lawn work. There are so many causes for failure over which we have no control; therefore we cannot assume full responsibility for stock after it has been delivered in good condition. Unfavorable weather, poor soil, careless planting, and culture all contribute to failure and are beyond our control. To establish your faith in our stock it must grow therefore we will gladly advise as to its planting and care.

Price and Terms

Prices quoted in this Catalogue are for the plants dug and delivered in Fort Collins and vicinity. This Catalogue cancels all previous prices. Prices are subject to change without notice. We expect cash as soon as convenient after the goods are delivered, or work completed. However, as this work is seasonal and must be done at the proper time; or wait until another season; we can usually make arrangements so that you can do what planting your year's budget will permit.

Our Landscape Service

To beautifully landscape a home requires a knowledge of the principles of landscape design. A thorough knowledge of plants, their characteristics and habits of growth. Numerous factors must be considered, such as adaptability of plants to soil, sun and shade. The height of plants at maturity, type of foliage, time and color of bloom, are all of utmost importance to obtain the best in landscape design. A telephone call (824-W) will bring a representative to your assistance. We gladly offer our years of training and experience in helping and informing you in planning and landscaping your home. Our Landscape Guarantee—all nursery stock sold and planted by our Landscaping Department, which fails to grow the first growing season will be replaced at one-half price with plants of like size and variety.

Lawn Service

We have power equipment for grading, preparing and seeding new and old lawns. We guarantee all work to be satisfactory. No one can guarantee the growth of a lawn for when planted properly and with good seed it will grow if properly cared for. We will gladly advise as to the proper care of new and old lawns.

Spraying

We are able to take care of your spraying and dusting needs for your shrubs, evergreens, small plants and lawns. We have been unable to obtain a large sprayer for shade and fruit trees. Next year we hope to offer this service also.

Tree Trimming and Removing

We are fully equipped to handle almost any job. Experienced, well trained, insured men are on the job, which is done fast, well and right. We will give estimates and advise without obligation. Also, shrub pruning. The proper time for shrub pruning is right after they finish blooming. This will assure you better bloom for the following year.

Charge for Service

Tree service, lawn service, planting service and all other services:

Our men are well trained and experienced and equipped for all services. Their aim is to satisfy the customer by speedy and careful workmanship. Our minimum charge is \$1.75 per hour, per man. This includes necessary equipment, (not including truck if used for hauling purposes) workman's compensation and fully insured for public liability and property damage.
